

LAIBONO

LAIBONO

Liquid fertiliser NPK with microelements

LAIBONO is a liquid fertiliser NPK, enriched with microelements (boron, copper, manganese, molybdenum and zinc) easily assimilated.

It is recommended for favouring a balanced growing in the first phase of the vegetative cycle and for facilitating the fast recovery of plants subject to adverse conditions.

Its formulation, rich in nitrogen, assures a quick development with green leaves and strong plants, while its contents in potassium and microelements favours a rich and intense blossoming and healthy and balanced plants.

Crops and moments of application

LAIBONO is developed for all types of crops, especially CITRUS, FRUIT TREES, GRAPES, ORNAMENTALS AND VEGETABLES in phases of high consumption or when these elements are lacking (rooting, blooming, set fruit, etc.). Also, when the plants have been under adverse conditions or when it is required to stimulate the vegetative activity.

Dosage and Method of application

LAIBONO can be applied by leaf spraying or in radicular applications through the watering:

- LEAF SPRAY: apply at 200 to 300 ml/hl (0.2 to 0.3%) wetting carefully all parts of the vegetable.
- RADICULAR APPLICATIONS: 100 to 200 ml per 100 litres of water.

Leaf treatments are particularly recommended for quick recovery of plants subject to adverse conditions (frosts, lack of water, plagues, disease, etc.), or in phases of greater vegetative activity. Several applications can be given, if needed, every 10-15 days.

TECHNICAL SPECIFICATIONS

LAIBONO

PRODUCT	Liquid fertiliser with microelements.
COMPOSITION	Nitrogen (N) total: 9.0% N. nitric: 1.8%; N. ammoniacal: 0.6%; N. ureic: 6.6% Phosphoric anhydride (P ₂ O ₅) water soluble: 3.0% Potassium oxide (K ₂ O) water soluble: 6.0% Boron (B) water soluble: 0.02%; Copper* (Cu) water soluble: 0.03% Manganese* (Mn) water soluble: 0.04% Molybdenum (Mo) water soluble: 0.002% Zinc* (Zn) water soluble: 0.02% *Chelated by EDTA
FORMULATION	Soluble liquid (SL)
ASPECT	Blue liquid
pH	3
DENSITY	1.17 g/ml
SOLUBILITY	Water soluble
DOSE	Foliar spray: 200 - 300 g/hl (0.2 – 0.3%)
COMPATIBILITY	Compatible with the majority of agrochemicals except alkaline reaction products.
PRECAUTIONS	Avoid the treatments during the hottest hours.
PACKING	1 and 5 l
